DETAILED ACTION

Election/Restrictions

1. The restriction of claims 37-60 has been withdrawn and claims 37-60 have been considered on the merits in this office action.

Priority

2. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence(s) of the specification or in an application data sheet by identifying the prior application by application number (37 CFR 1.78(a)(2) and (a)(5)). If the prior application is a non-provisional application, the specific reference must also include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Claim Rejections - 35 USC § 102

3. Claims 9-13, 17-19, 35-40, 43-48, and 54-64 are rejected under 35 U.S.C. 102(e) as being anticipated by Togher et al 5,375,055. Togher shows a process for displaying quotes on a trader screen in an automated system that includes a plurality of traders with some having bilateral credit with one another (those being trading counterparties) displaying a quote by a first trader and providing indication of the quote being accepted

Art Unit: 3671

by more than one but less than all of the counterparties (col. 3, lines 1-21, figures 2-4). Togher shows that the first trader's trading counterparties can accept the first traders' quote if it is the best available (abstract, col.3 lines 1-21; claims 10, 19, 38, 46 and 56) if it is the best price available (claims 11, 35, 39, 47 and 57-61) or equal in price to another quote that is first in time relative to another quote (col. 13, line 55-59; claims 12 and 48). Togher shows the traders having bilateral credit with one another has an evolving credit status that is determined in real time in order to remain a trading counter party (col. 1, lines 55-68; claim 13). Togher shows the determination of the number of trading counterparties, determining a percentage who can accept the quote and providing the indication to the first trader when the percentage is greater than or equal to a predetermined percentage (col. 12, lines 31-51) and determining the number of counterparties who can accept the quote and comparing that number to the total number where the trading floor contain one or more individuals and the trading floor grants credit to the other trading floor (col. 4, lines 12-36 & figure 1; claims 17, 43 and 54) and the traders are individuals (figure 5; claims 18, 55, and 64).

As concerns claim 61 and 63, Togher shows the first trading entity has bilateral credit with another trading entity as a function of an amount of remaining credit a first credit granting entity, which is associated with the first trading entity, has extended to a second credit granting entity, which is associated with the other trading entity (col. 1, lines 55-68).

As concerns claim 62, shows the first and second credit granting entities are respective trading floors (figure 1).

Application/Control Number: 09/707,824

Art Unit: 3671

Claim Rejections - 35 USC § 103

Page 4

4. Claims 14-16, 20-34, 41-42, and 49-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Togher et al 5,375,055 in view of Galant 6,839,686. Togher does not display the percentage of those with bilateral credit; however, Galant is a similar process for displaying quotes on a trader screen in an automated system where the percentage of winners and loser or in this case the number of eligible traders with bilateral credit are displayed. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Togher, as taught by Galant, to display the percentage of possible traders, thus improving the information from which a trader can make an informed yet decisive decision to trade or not. Togher shows that the first trader's trading counterparties can accept the first traders' quote if it is the best available (abstract, col.3 lines 1-21; claims 21 and 32) if it is the best price available (claim 22) or equal in price to another quote that is first in time relative to another quote (col. 13, line 55-59; claim 23). Togher shows the determination of the number of trading counterparties, determining a percentage who can accept the quote and providing the indication to the first trader when the percentage is greater than or equal to a predetermined percentage (col. 12, lines 31-51; claim 25) and determining the number of counterparties who can accept the quote and comparing that number to the total number (abstract; claim 15) where the trading floor contain one or more individuals and the trading floor grants credit to the other trading floor (col. 4, lines 12-36; claim 30) and the traders are individuals (figure 5; claim 31). Togher shows, in figures 2-4, that

screens are used to graphically display data in specific fields utilizing the EBS system such as calculated percentages (claim 27-29 and 51-53).

As concern claims 16, 26 and 50, the percentage who can accept the quote and providing the indication to the first trader when the percentage is greater than or equal to a predetermined percentage of 25% is considered obvious to one of ordinary skill in the art since the examiner takes Official Notice that this particular percentage is arbitrary and requires on routine skill in that art to arrive and this percentage.

Response to Arguments

5. Applicant's arguments with respect to claim 9 and 20 of Tougher are noted; however, on lines 10-13 of column 1, the use of bilateral or established credit is disclosed. Regarding the percentage for possible buyer being produced is one of ordinary skill in the art as noted above in the rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas A Beach whose telephone number is 571-272-6988. The examiner can normally be reached on Monday-Thursday, 8:00am-6:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached at 571-272-6998. The fax phone numbers for the organization where this application or proceeding is assigned are 703.872.9306 for regular communications and 703.872.9306 for After Final communications.
